

Getting Started ARE H15 Demo Program

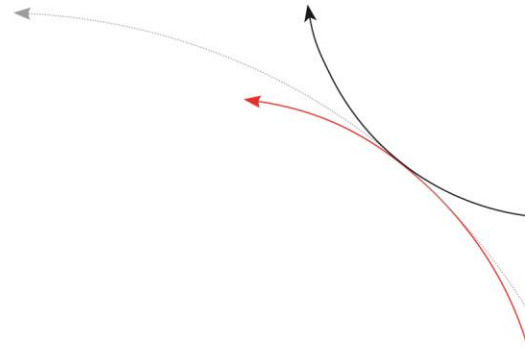

- Switch on the H15.
- Start the "RFIDReaderDemo" program.

- Start and stop reading a RFID Transponder with the "Start/Stop Reading" button, or with the upper button on the right hand side, or with the F2 button.
If a transponder code can be read successfully the transponder text field is painted green and the transponder code is shown. If sound output is activated, an additional acoustic signal is played.
No reads are shown in red.

- Start the barcode scanner with the upper button on the left hand side, or with the F1 button.
If a barcode is detected the barcode text is shown in the barcode text field.
